

TA'OR 

THE VISION FOR TA'OR.

Can we manufacture a wooden drawer that's as good as a handmade one - or perhaps even better? Can we offer millions of individual design variations to choose from, and make it easy and convenient to order? Can we reimagine a product that has been around for decades? Yes we can!

We think outside the box. We question the norm. We are open to be inspired by contemporary design and set ourselves the most ambitious goal. A goal which goes beyond simply satisfying our customers. Our aim is to inspire them, to surprise them and to convince them of our unyielding quality.

A person is shown from the side, holding a large, light-colored wooden panel above their head. They are wearing a dark long-sleeved shirt and brown leather boots. In the foreground, there is a wooden box system, which is a rectangular frame made of light-colored wood. The background is a dark, solid color. A dark grey rectangular box with a gold-colored corner is positioned in the upper right quadrant, containing the text.

TA'OR BOX,
THE WOODEN
BOX SYSTEM.

TANGIBLE
EXPERTISE.

With its pioneering design and processing, TA'OR BOX creates entirely new design possibilities. Developed and produced by Van Hoescke, fine-tuned thanks to years of experience as a partner in the furniture industry. In 50 years, the company has grown from a distributor into a manufacturer supplying 15,000 box systems to clients each week.

HIGH TECH FOR PREMIUM QUALITY.

TA'OR BOX is manufactured with ultramodern equipment. All parts are milled to an accuracy of 1/100 mm. A precision that is not feasible in traditional manufacturing.

CUSTOM MACHINES.

Developed by the top OEMs (original equipment manufacturers) and used for the first time for TA'OR BOX.

MAXIMUM FLEXIBILITY.

Create every possible combination with different designs. Available in individual sizes – from 1 piece.

PERFECT PLAN, EFFICIENT PROCESSING.

Our online configurator has been perfectly aligned with the needs of our customers. In only a few clicks you can quickly and intuitively order your desired TA'OR BOX. Enjoy the enormous choice but without complex selection processes.

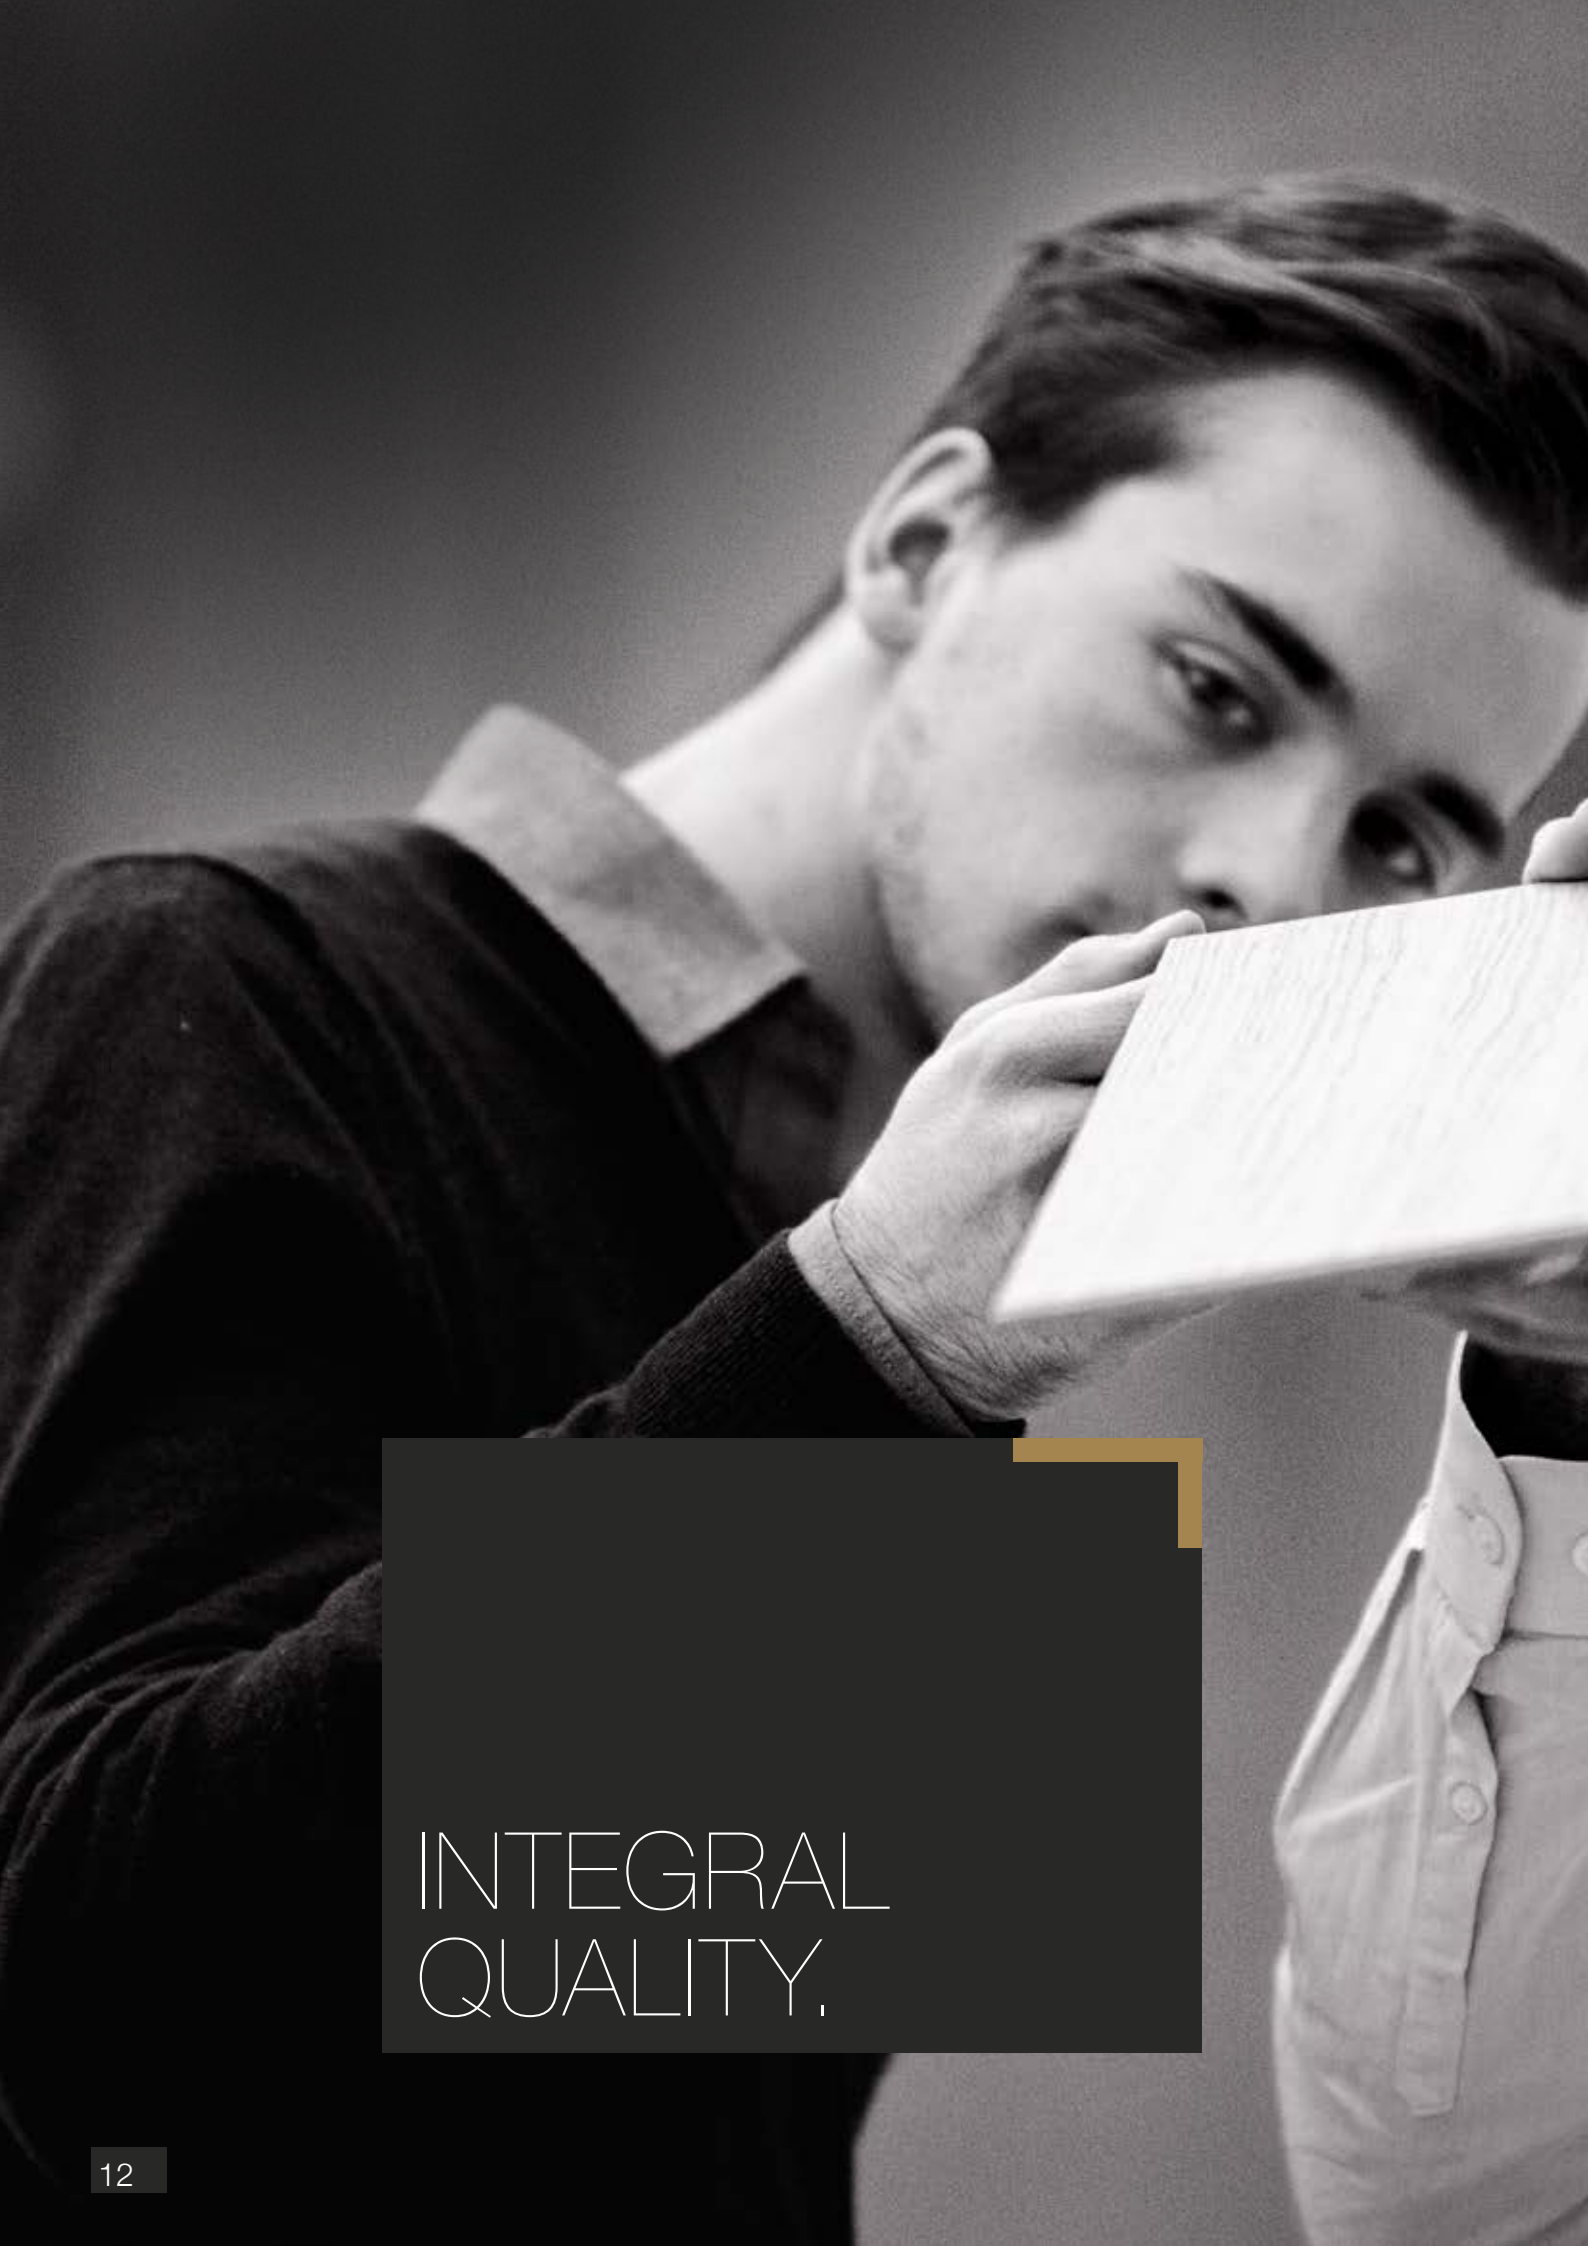

The exact price and guaranteed delivery date of TA'OR BOX are immediately displayed.

CAD DATA AVAILABLE.

In order to provide maximum support with your planning and processing, Blum offers many different CAD/CAM formats – quickly and 24/7.

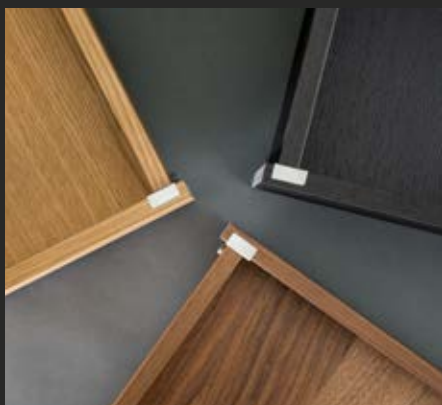

INTEGRAL
QUALITY.

Premium raw materials which are processed with digitally-driven, high-tech equipment create the quality that you can both see and feel in every TA'OR BOX. The seamless connections on the outside are clear evidence, while plenty of other treats are hidden on the inside.

QUALITY THAT CREATES VALUE.

First-quality veneer, certificates for all materials, patented technologies: TA'OR BOX stands for uncompromising quality and beauty behind furniture fronts. Down to the very last detail.

CLEAR, RECTANGULAR LINES

Side panels of only 13 mm wide accentuate the clear, minimalist design. The edges are treated with a special coating, rendering them almost inconceivable.

TECHNIQUES DEVELOPMENT IN-HOUSE.

The cutting edge manufacturing techniques for TA'OR BOX allow for a patented metal front fixing bracket to be integrated in the wooden side panel.

INCONCEIVABLE TECHNOLOGY UNDER THE BOX SYSTEM.

For the fittings technology TA'OR BOX relies on the quality of hardware manufacturer Blum. This results in an outstanding performance of the runner, ease of assembly and four-dimensional adjustment.

FRONT ASSEMBLY WITHOUT TOOLS.

You will hear the superior front fixings by Blum click into place. The front is seamlessly and firmly attached.

ASSEMBLED
AND READY
TO USE.

The knowledge and experience gained in assembling TANDEMBOX and LEGRABOX has been used to perfect the production process for TA'OR BOX. This makes no difference to you, as you receive the box system ready to use, completely ready for installation and finishing.

BOX SYSTEM ASSEMBLY

Our TA'OR BOX box systems are supplied ready to use and custom made. Everything is handled by the ultra-modern machines at the factory in Sint-Niklaas. Discover how we produce our TA'OR BOX systems and prepare them for transport in 48 hours.

HANDMADE HIGH TECH

When they leave us, our box systems are ready to install. Thanks to the unique inner design of the TA'OR BOX, the front simply clicks tight onto the box system. Take a look at our different packaging options and choose the one that best suits your working method.

COMPATIBLE ASSEMBLY TEMPLATES.

Blum's assembly template is equipped with a special element facilitating front drilling for TA'OR BOX.

DESIGN.

The box system is available as a three-sided drawer, or as an inner drawer.

CHOOSE
OR MIX.

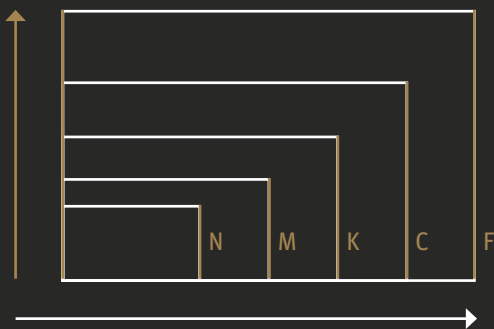

Infinite range of options?
Individual freedom of design
combined with industrial
manufacturing? At first glance,
that would be impossible to
achieve. But because of its
many colours, materials and
sizes, TA'OR BOX offers no
end of possibilities.

AN EXCITING COMBINATION.

TA'OR BOX is 100% compatible with LEGRABOX. Wherever LEGRABOX by Blum is installed, TA'OR BOX offers appealing add-ons in wood without the need for a production switch. Even the front assembly is identical.

The fronts and front fixing brackets that fit on any LEGRABOX will also fit on TA'OR BOX.

HEIGHT SIDE PANEL

NOMINAL LENGTH

flexible from 250 to 750 mm

LEGRABOX OR TA'OR BOX?

There's no need to change anything, the body is exactly the same thanks to identical sizing.

LEGRABOX

TA'OR BOX

TRUE COLOURS.

In collaboration with leading manufacturers of materials in wood, we chose a range of contemporary designs: real wood veneer; the classics in black and white; and wood grain decors in a range of colours.

The unique side panel design allows new combinations, such as wood colour with pure black or white. Everything you need to add a personal touch.

The most recent colours can be found on our website
www.taorbox.com/combining

Actual colours may vary from the printed version.

PERSONAL FREEDOM.

Finished in various types of high-quality veneer or stylish wood decor, TA'OR BOX blends beautifully into every interior. The unique system allows all colours and materials to be combined, both inside and out, and therefore gives even greater freedom for personalisation. In doing so, TA'OR BOX stands for uncompromising quality and beauty behind furniture fronts, down to the very last detail.

VAN HOECKE,
A TRADITIONAL
COMPANY WITH
A PIONEERING
SPIRIT.

Daring to be different.
Re-experiencing tried and tested quality. When we develop a product, we do not seek to satisfy our customers. We aim to excite them, surprise them, convince them. TA'OR BOX is an entirely new concept, which changes the familiar processes completely.

Coming to join the innovation?

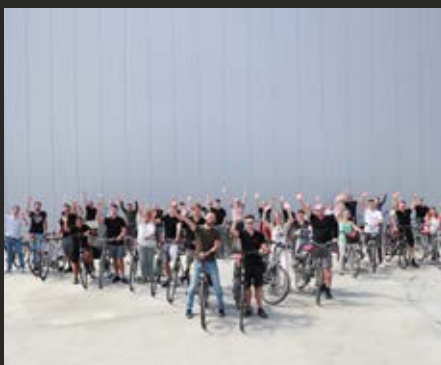

TRADITIONALLY INNOVATIVE.

Creative ideas and state-of-the-art furniture and fittings services. That is what has characterised Van Hoeske since 1967.

ULTRA-MODERN MANUFACTURING AND LOGISTICS

52,000 m² in all, extending into different parts of the world: Van Hoeske is built on years of experience in the export of furniture components and fittings. Within Belgium, to the Netherlands and Luxembourg, but also to Switzerland, Germany and France,...

PEOPLE MAKE THE DIFFERENCE.

This evolution is only possible thanks to our customers' trust and the commitment of our employees – more than 250 people who give their all, day after day.

SUSTAINABLE BUSINESS.

In order to heat our buildings ecologically in the winter, we have installed a silo and a biomass boiler in which we burn waste wood from our manufacturing. The leftovers from HDF panels used to make our box systems are crushed and stored in the silo.

This wood waste is used later to fuel the biomass boiler. This also allows us to reduce the number of waste lorries on the road by a grand total of 150 per year!

SILO.

The boiler is equipped with various filters which recover dust particles and fumes so that we are sure only to release clean air into the environment.

BACK TO BASICS.

We carefully select our veneers and melamine wood decors from the market leader in the industry. Taking sustainability into account, we only use raw materials with a PEFC certificate.
